ADD-20USB Monaural Headset

The ADDCOM ADD-20USB Monaural Headset has been specially designed to work with the Microsoft platforms offering greater flexibility and range around your workstation.

The simple to use USB can also be easily deployed to work with your existing IT system and once connected to the PC, the headset seamlessly registers on the Lync server and is ready to use.

The headset features a durable boom arm and noise-cancelling technology, superior sound quality and all day comfort.

- Plug and play: once connected, the headset registers and is ready to use
- First run experience: Automatic detection of the headset
- Mute/un-mute via PC controls or in-line on the headset
- Audio quality (embedded in the headset): no echo or excessive glitches, echo cancellation across devices, wide-band / Microsoft media platform with RT audio
